Requests and inquiries concerning reproduction and rights should be addressed to the Commonwealth Copyright Administration, Attorney General's Department, Robert Garran Offices, National Circuit, Barton ACT 2600 or posted at <http://www.ag.gov.au/cca>

This Schedule provides information on the arrangements for the prescribing of pharmaceutical benefits by medical practitioners and participating dental practitioners, and the supply of pharmaceutical benefits by approved pharmacists, approved medical practitioners and approved hospital authorities. These arrangements operate under the *National Health Act 1953*. However, at the time of printing, the relevant legislation giving authority for the changes included in this issue of the Schedule may still be subject to the usual Parliamentary scrutiny. This book is not a legal document, and, in cases of discrepancy, the legislation will be the source document for payment for the supply of pharmaceutical benefits. The legislation is available from the Federal Register of Legislative Instruments website at <http://www.frli.gov.au>.

PHARMACEUTICAL BENEFITS

These changes to the Schedule of Pharmaceutical Benefits for Dental Practitioners are effective from 1 August 2007. The Schedule is updated on the first day of each month and is available on the Internet at www.pbs.gov.au.

SUMMARY OF CHANGES

ADDITIONS

Additions - Brands

5006L *Clavycillin 875/125, CR* — **Amoxicillin with clavulanic acid**, Tablet 875 mg-125 mg

DELETIONS

Deletions - Brands

5090X *Floxsig, SI* — **Flucloxacillin**, Capsule 250 mg

5091Y *Floxsig, SI* — **Flucloxacillin**, Capsule 500 mg

ADVANCE NOTICES

Advance Notices - Deletion of Items

The following items will be deleted from the Schedule of Pharmaceutical Benefits on 1 **September** 2007:

Items discontinued by the manufacturer -

5013W **Ampicillin**, Capsule 250 mg (*Alphacin 250*)

5014X **Ampicillin**, Capsule 500 mg (*Alphacin 500*)

Section 1 – Explanatory Notes

Introduction

These Explanatory Notes are provided to help dentists work within the Australian Government's Pharmaceutical Benefits Scheme (PBS).

The PBS is a system of subsidising the cost of most prescription medicines. The subsidies are available to all Australian residents and eligible foreign visitors, i.e., people from countries which have Reciprocal Health Care Agreements with Australia. These countries are the United Kingdom, Ireland, New Zealand, Malta, Italy, Sweden, the Netherlands, Finland, and Norway.

The aim of the PBS, which has been in operation since 1948, is to provide reliable and affordable access to a wide range of necessary medicines.

The Schedule of Pharmaceutical Benefits – referred to throughout as the 'Schedule' – lists all of the medicines available under the PBS, and explains how they can be used in order to be subsidised.

The Schedule is produced monthly by the Australian Department of Health and Ageing (effective on the first day of each month).

It is vital therefore that dentists remain up to date with information on which medicines are included in or excluded from the Schedule, whether restrictions apply to the medicines, and how much patients should pay. Queries relating to the PBS can be made to the Pharmaceutical Branch in the State offices of Medicare Australia (telephone 132 290 Mondays to Fridays, during business hours). Queries relating to the Repatriation Pharmaceutical Benefits Scheme (RPBS) can be made to the State offices of the Department of Veterans' Affairs (DVA) (telephone 1800 552 580).

1. The Schedule — Where to Find What

The Schedule of Pharmaceutical Benefits is divided into sections. At the start of the Schedule, immediately after the table of contents, is a summary of any changes to listed items.

The last pages of the Schedule provide a generic/proprietary index of PBS and RPBS ready-prepared items.

Section 1

Section 1 is what you are reading, the Explanatory Notes. It outlines the correct way to prescribe pharmaceutical benefits, patient charges and who qualifies for concessions. This is followed by a list of Medicare Australia contacts and addresses, then an index of manufacturers' codes.

Section 2

This section lists ready-prepared items, and includes the form, manner of administration, brand and brand equivalents that may be prescribed, and the maximum quantity for each item.

Any medicines that have restrictions on how they can be prescribed are printed in ***bold italics***. Items appearing in more than one therapeutic group are cross-referenced.

Page 2 of Section 2 explains symbols used throughout the Schedule.

The use of 'NOTE' in this section is used to clarify how some pharmaceutical benefits should be prescribed.

The use of 'CAUTION' is to warn of known adverse reactions from, or precautions to be taken with, a particular pharmaceutical benefit. (The absence of a cautionary note does not imply reactions may not happen.)

2. Prescribing Medicines — Information for Dentists

Eligible prescribers

Pharmaceutical benefits can only be prescribed by dentists who are approved to work within the PBS.

PBS prescription forms

Standard PBS prescription forms are available from Medicare Australia for prescribing pharmaceutical benefits.

- *Personalised forms* – have the dentist's name, qualifications, practice address/es, telephone number and prescriber number.
- *Non-personalised (blank) forms* – are distributed for emergency supply only. Both forms for dentists are supplied free of charge.

Ordering forms

Dentists are asked not to over order. Getting the right amount of forms helps to reduce the cost to taxpayers and helps to reduce paper wastage. Also, the pads may deteriorate if stored over time.

Order forms for standard PBS prescription forms are available from Medicare Australia stationery officers. Contact details are listed in the front of the Schedule.

Orders for PBS prescription stationery will only be accepted by application in writing and through the channels mentioned above.

Preparing general prescriptions

Do's and don't's

A PBS prescription is only valid when it is written by an approved dentist for dental treatment only.

The prescription must be for the treatment of the person named on the PBS prescription. A PBS prescription may only be written for the treatment of one person.

A dentist cannot write more than one PBS prescription for the same pharmaceutical benefit for the same person on the same day.

Up to **three** pharmaceutical benefit items may be included on a single PBS prescription form, but pharmaceutical benefits and non-pharmaceutical benefits should not be listed together on the one PBS prescription form.

If an item has a particular manner of administration it may not, as a pharmaceutical benefit, be administered in any other way, e.g., an ophthalmic preparation may not be prescribed for topical use.

If an item is restricted, but the patient is not suffering from one of the specified conditions, it cannot be prescribed as a pharmaceutical benefit. The dentist should write the prescription either on a private prescription or on a standard prescription with 'PBS/RPBS' clearly struck out. It should also be endorsed 'non-PBS'.

A dentist cannot prescribe a narcotic drug for him/herself. In some States and Territories the prescribing of drugs of addiction by dentists is not permitted.

Dentists are issued with individual PBS prescription pads by Medicare Australia for their own use – these pads should not be used by other dentists, as this can cause confusion through incorrect pharmacy records.

Dentists are required to include their prescriber numbers on non-personalised PBS prescriptions.

The following admixtures are not pharmaceutical benefits:

- the admixture of two or more ready-prepared items listed in the Schedule; or
- the admixture of a non-pharmaceutical benefit item with a pharmaceutical benefit item.

Writing the PBS prescription

The following rules apply for writing PBS prescriptions:

- they must be written in indelible form (i.e., ink or ball-point pen) in the dentist's own handwriting (exceptions must be approved by Medicare Australia's Chief Executive Officer) either on the standard PBS prescription, or on paper approximately 18 cm x 12 cm, or they can be generated by computer on a form approved by Medicare Australia. For patient safety reasons, both the original and the duplicate must be legible;
- they must record the dentist's name, address and prescriber number, the patient's name, address and entitlement status (i.e. whether they are a 'concessional' or 'general' patient), and whether the prescription is under the PBS or RPBS;
- they should completely identify the pharmaceutical benefit by detailing the item, dose, form, strength, quantity and instructions for use;
- they should indicate where brand substitution is not permitted. PBS prescriptions must not be prepared using a computer prescribing program that contains a default which would result in all prescriptions being indicated as Brand Substitution Not Permitted;
- where 'solvent required' is included after the form, the volume and number of ampoules must be specified; and
- they must be signed by the dentist and dated. Forward or back dating is not permitted.

There are separate arrangements for PBS prescriptions in certain public hospitals. To gain access to pharmaceutical benefits under this arrangement a patient must attend a participating public hospital and be a discharge patient or non-admitted patient. Only a dental practitioner, in course of employment with the participating public hospital, may prescribe the subsidised medication. The States of Victoria, Queensland and Western Australia have agreed to implement these arrangements.

Restrictions

Pharmaceutical benefits listed in this Schedule fall into two broad categories:

Unrestricted benefits – which have no restrictions on their therapeutic uses; and

Restricted benefits – which can only be prescribed for specific therapeutic uses (they are noted as **restricted benefit**).

Maximum quantities

The maximum quantities allowed for PBS items are recommended by the Pharmaceutical Benefits Advisory Committee (PBAC). Dentists cannot prescribe repeats.

PBS prescriptions can be for any quantity up to the maximum. It is not necessary to prescribe the maximum quantity if a lesser quantity is sufficient for the patient's needs. Please clearly indicate the number of tablets, capsules, etc. required, and **do not use** abbreviations such as 'Max. Qty', or 'M.Q.'

Urgent cases

In urgent cases and where State/Territory law allows, a dentist may telephone a pharmacist and ask that a PBS prescription be supplied. He/she must then forward the written PBS prescription and duplicate to the pharmacist within **seven days of the date of supply**.

3. Patient Charges

Type of patient

There are two types of PBS beneficiaries – general patients and concessional patients. General patients hold a Medicare card. Concessional patients hold a Medicare card and one of the following cards from Centrelink or the Department of Veterans' Affairs (DVA):

- Pensioner Concession Card
- Commonwealth Seniors Health Card
- Health Care Card
- Repatriation Health Card For All Conditions (gold) – concessional patients under RPBS
- Repatriation Health Card For Specific Conditions (white) – only regarded as concessional patients for RPBS prescriptions unless they hold a separate entitlement from Centrelink, otherwise they are general patients
- Repatriation Pharmaceutical Benefits Card (orange) – concessional patients under RPBS
- Safety Net Concession Card or Safety Net Entitlement Card are also issued by Medicare Australia.

Under the Reciprocal Health Care Agreements (RHCA), visitors from participating countries (see the introduction of this section for the list of countries) are treated as general patients – they do not have concessional entitlements. To receive pharmaceutical benefits, these visitors may need to present a temporary Medicare card or their passport.

What patients pay

Patient contribution

Under the PBS, the maximum cost for a pharmaceutical benefit item at a pharmacy is \$30.70 for general patients and \$4.90 for concessional patients (except where a brand premium applies).

Patients who have a Safety Net Entitlement Card receive PBS items for free, except where a brand premium applies.

The contribution rate for general patients as outpatients at public hospitals throughout Australia is \$24.60.

The exception is Queensland and hospitals participating in the pharmaceutical reforms where they pay the safety net value of an item when it is listed in the Schedule, or up to \$30.70 for items not listed in the Schedule. The public hospital pharmaceutical reforms enable participating public hospitals to prescribe and supply pharmaceutical medication from the PBS to outpatients and patients upon discharge.

The contribution rate for concessional patients in all public hospitals is \$4.90.

The supply of a pharmaceutical benefit or a Repatriation pharmaceutical benefit to a patient is a GST-free supply. Goods and services tax must not be included in the price charged to a patient for the supply of a benefit under the PBS or RPBS.

It is the patient's responsibility to meet any charge lawfully demanded by an approved pharmacist, otherwise supply may be refused.

The patient contribution rates are usually adjusted on 1 January each year in line with inflation.

Patient contributions for early supply of some PBS medicines

Prescriptions for some pharmaceutical benefits are not eligible for Safety Net benefits if resupplied within 20 days of a previous supply of the same pharmaceutical benefit for the same person under the PBS or the RPBS. (This is known as the 'Safety Net 20 day rule' which came into effect on 1 January 2006.)

Where a prescription is subject to the Safety Net 20 day rule, exclusion from Safety Net benefits has the following effects:

- the patient contribution does not count towards the Safety Net
- after the Safety Net threshold is reached, the usual patient payment amount for the corresponding entitlement level (not the Safety Net amount) applies.

There are no pharmaceutical benefits listed for prescribing by dentists that are subject to the Safety Net 20 day rule.

Brand premiums

Under the brand premium arrangements, Commonwealth reimbursement to pharmacists is based on the lowest-priced brand. Patients pay the difference for higher-priced brands, on top of their usual patient contribution.

The Schedule's brand premiums apply to maximum quantities. When a quantity is less than the maximum, the premium will be a fraction of the maximum quantity, using standard pricing rules.

Solvents

Where a solvent is prescribed as part of a pharmaceutical benefit, only one patient contribution is charged.

4. RPBS Dental Prescribing

Under Department of Veterans' Affairs (DVA) arrangements, financial responsibility for pharmaceutical benefits prescribed by a Local Dental Officer (LDO) is limited to the treatment to which holders of the following cards are entitled:

- a Gold Repatriation Health Card For All Conditions; or
- a White Repatriation Health Card For Specific Conditions; or
- an Orange Repatriation Pharmaceutical Benefits Card.

Where possible the LDO shall prescribe in accordance with the provisions governing dental prescribing under the PBS.

Prescriptions for PBS Dental Schedule items for Gold, White and Orange Card holders are to be dispensed at the PBS concessional rate. The card holder is required to meet the cost of any applicable brand premium.

When a non-PBS Dental Schedule item is prescribed for an eligible card holder, the LDO's private prescription form should be used. The dispensing pharmacist may charge the patient the full cost of the prescription. The patient may claim a refund for the full cost of a non-Schedule item from DVA if an itemised receipt (not a cash register receipt) and a copy of the prescription are provided.

Addresses — Medicare Australia

Medicare Australia has responsibility for the operational aspects of the Pharmaceutical Benefits Scheme (PBS). This responsibility covers the processing of pharmaceutical benefit and safety net claims, and PBS stationery used by participating dental practitioners.

Procedures for ordering prescription forms are set out in Section 1 (Explanatory Notes) of this Schedule.

Section 2
Schedule of Benefits

SYMBOLS USED IN THE SCHEDULE

An arrow (>) in front of a restriction indicates an additional or amended purpose in this issue.

An asterisk (*) against the dispensed price of a benefit indicates that the manufacturer's pack does not coincide with the maximum quantity.

A double dagger (‡) in the maximum quantity column indicates an item for which the maximum quantity has been specially determined to correspond to the manufacturer's pack and the manufacturer's standard pack should be prescribed and supplied. For any item where a maximum quantity greater than 1 is marked with a double dagger (‡), that maximum quantity should be prescribed and supplied.

A gauge sign (#) against the dispensed price of a benefit indicates that the product is not preconstituted and that an extemporaneously-prepared dispensing fee is included in the dispensed price and, where appropriate, an amount for purified water.

Where a STATE is indicated after a manufacturer's code, that brand may be available only in the State indicated. NSW-(N); Vic-(V); Qld-(Q); SA-(S); WA-(W); Tas-(T).

RESTRICTED BENEFITS

All restricted items are printed in ***bold italics***. These items may be prescribed as pharmaceutical benefits only for use for one of the specified indications. Where more than one indication is specified for a restricted pharmaceutical benefit, each indication is separated from the preceding indication by a semi-colon and commences on the next line. The drug may be prescribed as a pharmaceutical benefit for a patient who qualifies under any of the specified indications.

A straight line is drawn between entries for different forms and strengths of an item to indicate clearly the different restrictions which apply to these various forms and strengths.

CODES FOR INJECTABLE ITEMS WITH ALLOWABLE SOLVENTS

The entry in this Schedule of those pharmaceutical benefit injectable items which require a solvent includes the codes of the items with the relevant solvents. For each such item the code is for the injectable with 10 mL sodium chloride injection 9 mg per mL (0.9%).

BRAND EQUIVALENCE

'a' located immediately before brand names of a particular strength of an item indicates that the sponsors of these brands have submitted evidence that they have been demonstrated to be bioequivalent or therapeutically equivalent, or that justification for not needing bioequivalence or therapeutic equivalence data has been provided to and accepted by the Therapeutic Goods Administration. It would thus be expected that these brands may be interchanged without differences in clinical effect.

For other brands of an item, i.e., those not indicated as above, it is unknown whether or not they are equivalent. There may be several reasons for this, such as bioequivalence data not being considered necessary when the products were approved for marketing, or that advice or data have not been forthcoming from sponsors. This does not necessarily suggest a lack of safety or efficacy, but in these circumstances caution should be taken if brands are interchanged.

'b' attached to brand names indicates that these brands are also equivalent, but that it is not known if there is equivalence between brands marked 'a' and brands marked 'b'.

BRAND PREMIUM POLICY

The Brand Premium Policy was introduced on 1 December 1990 to increase price competition by allowing pharmaceutical manufacturers to set their own price on multi-branded items listed on the Pharmaceutical Benefits Scheme and to encourage the development of the generic pharmaceutical industry in Australia.

The policy does this by increasing prescribers' and patients' consciousness about the price of drugs. In effect, it makes both groups question whether it is necessary for the patient to pay more for the drugs when a cheaper brand is available. The policy also allows companies to establish prices taking into account competition and consumer acceptance.

The policy operates where there is more than one brand of a particular drug available through the Pharmaceutical Benefits Scheme and where the brands are therapeutically interchangeable. Due to this, the policy mainly applies to out of patent drugs.

Basically the policy operates by:

- the Australian Government subsidising a drug to the level of the lowest priced brand (except in those instances where the lowest priced brand has, as part of its price, a therapeutic group premium);
- suppliers of other brands of that drug being able to set a price above the price charged by the supplier(s) of the lowest priced brand(s); and
- the patient paying the brand premium which is the price difference between the lowest price brand and the brand prescribed.

If a prescription is written generically or for the lowest priced brand, and the lowest priced brand is supplied, there is no brand premium payable.

'B' located immediately before an amount in the premium column indicates a brand premium which applies to that particular brand of the item.

The success of the Government in controlling prices of products supplied through the Pharmaceutical Benefits Scheme has often been criticised by the pharmaceutical industry. Under the Brand Premium Policy, suppliers of multi-branded items are able to set their own prices at a level that they think the market will bear. At the same time, the prescriber and the patient can decide whether it is necessary to pay more for a particular brand when a cheaper one is available and is therapeutically interchangeable.

The brand premium does not count toward the patient's safety net.

It should be noted that the brand premium is not a Government charge or revenue. The premium arises from the manufacturer's price and the majority goes to the manufacturer with wholesalers and pharmacists receiving a small percentage.

SPECIAL PHARMACEUTICAL BENEFITS

The special patient contribution is payable by all patients in addition to the relevant patient contribution for concessional and general patients.

5224Y	Tablet 500 mg	300	* 13.09	14.10	^a Chem mart Chemadol	CH
							^a Dymadon P	PC
							^a Febridol	GM
							^a Panamax	SW
							^b Parahexal	HX
							^a Paralgin	FM
							^b Parmol	AW
							^a Terry White Chemists Paracetamol	TW
							^b Tylenol	JT

ANTIPILEPTICS

Antiepileptics
• Carboxamide derivatives
CARBAMAZEPINE

5039F	Tablet 100 mg	200	21.67	22.68	^a Carbamazepine Sandoz	SZ
				B3.25	24.92	22.68	^a Tegretol 100	NV
5040G	Tablet 200 mg	200	35.77	30.70	^a Carbamazepine Sandoz	SZ
				B3.50	39.27	30.70	^a Teril	AF
							^a Tegretol 200	NV
5038E	Tablet 200 mg (controlled release)	200	36.38	30.70	Tegretol CR 200	NV
5037D	Tablet 400 mg (controlled release)	200	64.25	30.70	Tegretol CR 400	NV
5041H	Oral suspension 100 mg per 5 mL, 300 mL	‡ 1	19.72	20.73	Tegretol Liquid	NV

ANTI-PARKINSON DRUGS

Anticholinergic agents
• Ethers of tropine or tropine derivatives
BENZTROPINE MESYLATE

5031T	Injection 2 mg in 2 mL	5	21.15	22.16	Cogentin	MK
-------	------------------------	---	----	----	-------	-------	----------	----

Code	Name, Restriction, Manner of Administration and Form	Max. Qty	No. of Rpts	Premium	Dispensed Price for Max. Qty \$	Maximum Recordable Value for Safety Net \$	Proprietary Name and Manufacturer	
PSYCHOLEPTICS								
Anxiolytics								
• Benzodiazepine derivatives								
DIAZEPAM								
5071X	Tablet 2 mg	50	7.42	8.43	^a Antenex 2 ^a Valpam 2	AF AW
				b0.87	8.29	8.43	Ducene	SU
				b1.27	8.69	8.43	^a Valium	RO
