**RITUXIMAB****NOTE:**

*Any queries concerning the arrangements to prescribe rituximab may be directed to Medicare Australia on 1800 700 270 (hours of operation 8 a.m. to 5 p.m. EST Monday to Friday).*

*Written applications for authority to prescribe rituximab should be forwarded to:*

*Medicare Australia*

*Prior Written Approval of Specialised Drugs*

*Reply Paid 9826*

*GPO Box 9826*

*HOBART TAS 7001*

*Further prescribing information is on the Medicare Australia website at [www.medicareaustralia.gov.au](http://www.medicareaustralia.gov.au).*

**NOTE:****TREATMENT OF ADULT PATIENTS WITH SEVERE ACTIVE RHEUMATOID ARTHRITIS**

*The following information applies to the prescribing under the Pharmaceutical Benefits Scheme (PBS) of the biological disease modifying anti-rheumatic drugs (bDMARDs) for adults with severe active rheumatoid arthritis. Where the term bDMARD appears in the following notes and restrictions it refers to the tumour necrosis factor (TNF) alfa antagonists (adalimumab, etanercept, infliximab), the chimeric anti-CD20 monoclonal antibody (rituximab) and the interleukin-1 inhibitor (anakinra).*

| Code | Item and Section 100 Restriction | Pack<br>Size | Price ex<br>Manufacturer<br>\$ | Proprietary<br>Name and<br>Manufacturer |
|------|----------------------------------|--------------|--------------------------------|-----------------------------------------|
|------|----------------------------------|--------------|--------------------------------|-----------------------------------------|

*Patients are eligible for PBS-subsidised treatment with only 1 of the above biological disease modifying anti-rheumatic drugs at any 1 time.*

*PBS-subsidised infliximab, anakinra and rituximab must be used in combination with methotrexate at a dose of at least 7.5 mg weekly. Where a patient cannot tolerate 7.5 mg of methotrexate weekly, they are only eligible to receive PBS-subsidised etanercept and adalimumab.*

*In order to be eligible to receive PBS-subsidised treatment with rituximab, a patient must have already failed to demonstrate a response to at least 1 course of treatment with a PBS-subsidised TNF-alfa antagonist.*

*From 1 August 2007, under the PBS, all patients will be able to commence a Treatment Cycle where they may trial PBS-subsidised bDMARD agents without having to experience a disease flare when swapping to an alternate agent. Under these interchangeability arrangements, within a single Treatment Cycle, a patient may continue to receive long-term treatment with a bDMARD while they continue to show a response to therapy.*

*A patient who received PBS-subsidised bDMARD treatment prior to 1 August 2007 is considered to be in their first Cycle as of 1 August 2007.*

*Within the same Treatment Cycle, a patient cannot trial and fail, or cease to respond to, the same PBS-subsidised bDMARD more than once.*

*Once a patient has either failed or ceased to respond to treatment 3 times, they are deemed to have completed a Treatment Cycle and they must have, at a minimum, a 5-year break in PBS-subsidised bDMARD therapy before they are eligible to commence the next Cycle.*

*For patients who have failed PBS-subsidised treatment with 3 bDMARDs prior to 1 August 2007 please contact Medicare Australia on 1800 700 270.*

*The 5-year break is measured from the date of the last approval for PBS-subsidised bDMARD treatment in the most recent Cycle to the date of the first application for initial treatment with a bDMARD under the new Treatment Cycle.*

*A patient who has failed fewer than 3 bDMARDs in a Treatment Cycle and who has a break in therapy of less than 5 years, may commence a further course of treatment within the same Treatment Cycle.*

*A patient who has failed fewer than 3 bDMARDs in a Treatment Cycle and who has a break in therapy of more than 5 years, may commence a new Treatment Cycle.*

*There is no limit to the number of Treatment Cycles a patient may undertake in their lifetime.*

*If patients fail to respond to a particular bDMARD within a single Treatment Cycle, they are not eligible to receive further PBS-subsidised treatment with that drug until they commence the next Cycle.*

*(1) How to prescribe PBS-subsidised bDMARD therapy after 1 August 2007.*

*(a) Initial treatment.*

*Applications for initial treatment should be made where:*

- (i) a patient has received no prior PBS-subsidised bDMARD treatment in this Treatment Cycle and wishes to commence such therapy, excluding rituximab (Initial 1); or*
- (ii) a patient has received prior PBS-subsidised (initial or continuing) bDMARD therapy and wishes to trial an alternate agent (Initial 2) [further details are under 'Swapping therapy' below]; or*
- (iii) a patient wishes to re-commence treatment with a specific bDMARD following a break in PBS-subsidised therapy with that agent (Initial 2).*

*Initial treatment authorisations will be limited to provide a maximum of 16 weeks of therapy for etanercept, adalimumab and anakinra, 22 weeks of therapy for infliximab and 2 infusions of rituximab.*

*From 1 August 2007, a patient must be assessed for response to any course of initial PBS-subsidised treatment (excluding rituximab) following a minimum of 12 weeks of therapy and this assessment must be submitted to Medicare Australia no later than 4 weeks from the date that course was ceased.*

*Rituximab patients must be assessed following a minimum of 12 weeks after the first infusion, and this assessment must be submitted to Medicare Australia within 4 weeks.*

*Where a response assessment is not submitted to Medicare Australia within these timeframes, the patient will be deemed to have failed to respond to treatment with that bDMARD.*

|------|----------------------------------|--------------|--------------------------------|-----------------------------------------|

*For second and subsequent courses of PBS-subsidised bDMARD (excluding rituximab) treatment it is recommended that a patient is reviewed in the month prior to completing their current course of treatment and that an application is submitted to Medicare Australia no later than 2 weeks prior to the patient completing their current treatment course.*

**Rituximab patients:**

*A further application may be submitted to Medicare Australia 24 weeks after the first infusion. New baselines may be submitted with this application if appropriate.*

**(b) Continuing treatment.**

*Following the completion of an initial treatment course with a specific bDMARD (excluding rituximab), a patient may qualify to receive up to 24 weeks of continuing treatment with that drug providing they have demonstrated an adequate response to treatment. The patient remains eligible to receive continuing bDMARD treatment with the same drug in courses of up to 24 weeks providing they continue to sustain the response.*

*It is recommended that a patient be reviewed in the month prior to completing their current course of treatment to ensure uninterrupted bDMARD supply.*

*Assessments of response to a course of PBS-subsidised therapy must be submitted to Medicare Australia no later than 4 weeks from the date that course was ceased.*

**Rituximab patients:**

*A patient may qualify to receive a further course of treatment (every 24 weeks) with this agent providing they have demonstrated an adequate response to treatment following a minimum of 12 weeks after the first infusion of their most recent treatment with rituximab. The patient remains eligible to receive a course of rituximab every 24 weeks providing they continue to demonstrate a response as specified in the restriction.*

*Where a response assessment is not submitted to Medicare Australia within these time frames, the patient will be deemed to have failed to respond to treatment with that bDMARD.*

**(2) Swapping therapy.**

*Once initial treatment with the first PBS-subsidised bDMARD is approved, a patient may swap to an alternate bDMARD within the same Treatment Cycle without having to requalify with respect to the indices of disease severity (i.e. the erythrocyte sedimentation rate (ESR), the C-reactive protein (CRP) levels and the joint count) or the prior non-bDMARD therapy requirements. However the requirement for concomitant treatment with methotrexate, where it applies, must be met for each bDMARD trialled.*

*Patients who are not able to complete a minimum of 12 weeks of an initial treatment course will be deemed to have failed treatment with that agent.*

*A patient may trial an alternate bDMARD at any time, regardless of whether they are receiving therapy (initial or continuing) with a bDMARD at the time of the application. However, they cannot swap to a particular bDMARD if they have failed to respond to prior treatment with that drug within the same Treatment Cycle.*

*In order to trial rituximab, a patient must have trialled and failed to demonstrate a response to at least 1 PBS-subsidised TNF- $\alpha$  antagonist treatment.*

*To ensure a patient receives the maximum treatment opportunities allowed under the interchangeability arrangements, it is important that they are assessed for response to every course of treatment approved, within the timeframes specified in the relevant restriction.*

*PBS subsidy does not allow for patients to receive treatment with another PBS-subsidised biological agent during the required treatment-free period applying to patients who have demonstrated a response to their most recent course of rituximab. This means that patients who have demonstrated a response to a course of rituximab must have a PBS-subsidised biological therapy treatment-free period of at least 22 weeks, immediately following the second infusion, before swapping to an alternate bDMARD. Patients who fail to respond to rituximab and who qualify and wish to trial a course of an alternate bDMARD may do so without having to have any treatment-free period.*

*To avoid confusion, an application for a patient who wishes to swap to an alternate bDMARD should be accompanied by the approved authority prescription or remaining repeats for the bDMARD the patient is ceasing.*

|------|----------------------------------|--------------|--------------------------------|-----------------------------------------|
|------|----------------------------------|--------------|--------------------------------|-----------------------------------------|

**NOTE:****(3) Baseline measurements to determine response.**

Medicare Australia will determine whether a response to treatment has been demonstrated based on the baseline measurements of the joint count, ESR and/or CRP submitted with the first authority application for a bDMARD. However, prescribers may provide new baseline measurements any time that an initial treatment authority application is submitted within a Treatment Cycle and Medicare Australia will assess response according to these revised baseline measurements.

To ensure consistency in determining response, the same indices of disease severity used to establish baseline at the commencement of treatment with each initial treatment application must be provided for all subsequent continuing treatment applications. Therefore, where only an ESR or CRP level is provided at baseline, an ESR or CRP level respectively must be provided to determine response.

**(4) Re-commencement of treatment after a 5-year break in PBS-subsidised therapy.**

A patient who wishes to trial a second or subsequent Treatment Cycle following a break in PBS-subsidised bDMARD therapy of at least 5 years, must requalify for initial treatment with respect to the indices of disease severity. Patients must have received treatment with at least 1 non-biological DMARD, at an adequate dose, for a minimum of 3 months at the time the ESR and/or CRP levels and the active joint count are measured.

**(5) Patients 'grandfathered' onto PBS-subsidised treatment with rituximab.**

From 1 August 2007, a patient who commenced treatment with rituximab for severe rheumatoid arthritis prior to 7 March 2007 and who was 'grandfathered' on to PBS-subsidised therapy, and who continues to receive treatment in the same Treatment Cycle, will have further applications for treatment with rituximab assessed under the continuing treatment restriction.

'Grandfather' arrangements will only apply for the first Treatment Cycle. For the second and subsequent Cycles, a 'grandfather' patient must requalify for initial treatment under the criteria that applies to a new patient. See 'Re-commencement of treatment after a 5-year break in PBS-subsidised therapy' above for further details.

**Public and private hospital authority required****Initial 2 (change or re-commencement)**

Application for an initial course of PBS-subsidised treatment with rituximab, in combination with methotrexate at a dose of at least 7.5 mg weekly, by a rheumatologist or clinical immunologist with expertise in the management of rheumatoid arthritis, of an adult who:

- (a) has a documented history of severe active rheumatoid arthritis; and
- (b) has failed to respond to at least 1 PBS-subsidised TNF-alfa antagonist in this Treatment Cycle; and
- (c) has not previously failed to respond to PBS-subsidised rituximab in the current Treatment Cycle.

Applications for patients who have demonstrated a response to PBS-subsidised rituximab treatment within this Treatment Cycle and who wish to re-commence rituximab treatment within the same Cycle following a break in therapy, will only be approved where evidence of a response to the patient's most recent course of PBS-subsidised rituximab treatment has been submitted to Medicare Australia.

A patient may qualify to receive a further course of treatment (1 infusion at week 0 and 1 infusion at week 2) every 24 weeks with this agent providing they have demonstrated an adequate response to treatment following a minimum of 12 weeks after the first infusion of their most recent treatment with rituximab. The patient remains eligible to receive a course of rituximab every 24 weeks providing they continue to demonstrate a response as specified in the restriction. The demonstration of response must be submitted to Medicare Australia within 4 weeks of assessment.

The same indices of disease severity used to establish baseline at the commencement of treatment with each initial application must be used for assessment of all continuing applications.

The authority application must be made in writing and must include:

- (1) a completed authority prescription form; and
- (2) a completed Rheumatoid Arthritis PBS Authority Application - Supporting Information Form [www.medicareaustralia.gov.au].

|------|----------------------------------|-----------|--------------------------|-----------------------------------|
|------|----------------------------------|-----------|--------------------------|-----------------------------------|

*Patients who fail to demonstrate a response to treatment with rituximab under this restriction will not be eligible to receive further PBS-subsidised treatment with this drug, in this Treatment Cycle. Patients may re-trial rituximab after a minimum of 5 years have elapsed between the date the last prescription for a PBS-subsidised bDMARD was approved in this Cycle and the date of the first application under the new Cycle.*

*Patients who fail to demonstrate a response to rituximab treatment and who qualify to trial an alternate bDMARD according to the interchangeability arrangements for bDMARDs for the treatment of severe rheumatoid arthritis, may do so without having to have a 22 week treatment-free period.*

*Patients who fail to demonstrate a response to treatment with 3 bDMARDs are deemed to have completed this Treatment Cycle and must cease PBS-subsidised therapy. These patients may re-commence a new bDMARD Treatment Cycle after a minimum of 5 years has elapsed between the date the last prescription for a PBS-subsidised bDMARD was approved in this Cycle and the date of the first application under the new Cycle.*

#### **Public and private hospital authority required**

*Initial 3 ('grandfather' patients)*

*Initial PBS-subsidised supply for continuing treatment with rituximab, in combination with methotrexate at a dose of at least 7.5 mg weekly, by a rheumatologist or clinical immunologist with expertise in the management of rheumatoid arthritis, of an adult who:*

- (a) has a documented history of severe active rheumatoid arthritis; and*
- (b) was receiving treatment with rituximab prior to 7 March 2007; and*
- (c) has demonstrated a response as specified in the criteria for continuing PBS-subsidised treatment with rituximab.*

*The authority application must be made in writing and must include:*

- (1) a completed authority prescription form; and*
- (2) a completed Rheumatoid Arthritis PBS Authority Application - Supporting Information Form [www.medicareaustralia.gov.au] which includes the signed patient acknowledgement form.*

*The same indices of disease severity used to establish baseline at the commencement of treatment with a bDMARD must be used for assessment of all continuing applications.*

*Patients who fail to demonstrate a response to treatment with 3 bDMARDs are deemed to have completed this Treatment Cycle and must cease PBS-subsidised therapy. These patients may re-commence a new bDMARD Treatment Cycle after a minimum of 5 years has elapsed between the date the last prescription for a PBS-subsidised bDMARD was approved in this Cycle and the date of the first application under the new Cycle.*

*Patients can qualify for PBS-subsidised treatment under this criteria once only.*

#### **Public and private hospital authority required**

*Continuing treatment*

*Continuing PBS-subsidised treatment with rituximab, in combination with methotrexate at a dose of at least 7.5 mg weekly, by a rheumatologist or clinical immunologist with expertise in the management of rheumatoid arthritis, of an adult:*

- (a) who has a documented history of severe active rheumatoid arthritis; and*
- (b) who has demonstrated an adequate response to treatment with rituximab; and*
- (c) whose most recent course of PBS-subsidised bDMARD treatment in this Treatment Cycle was with rituximab.*

*An adequate response to treatment is defined as:*

*an ESR no greater than 25 mm per hour or a CRP level no greater than 15 mg per L or either marker reduced by at least 20% from baseline;*

*AND either of the following:*

- (i) a reduction in the total active (swollen and tender) joint count by at least 50% from baseline, where baseline is at least 20 active joints; or*
- (ii) a reduction in the number of the following major active joints, from at least 4, by at least 50%:*
  - elbow, wrist, knee and/or ankle (assessed as swollen and tender); and/or*
  - shoulder and/or hip (assessed as pain in passive movement and restriction of passive movement, where pain and limitation of movement are due to active disease and not irreversible damage such as joint destruction or bony overgrowth).*

| Code  | Item and Section 100 Restriction                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Pack Size | Price ex Manufacturer \$ | Proprietary Name and Manufacturer |    |

#### SILDENAFIL CITRATE

##### NOTE:

*Any queries concerning the arrangements to prescribe sildenafil citrate may be directed to Medicare Australia on 1800 700 270 (hours of operation 8 a.m. to 5 p.m. EST Monday to Friday).*

*Written applications for authority to prescribe sildenafil citrate should be forwarded to:*

*Medicare Australia*

*Prior Written Approval of Specialised Drugs*

*Reply Paid 9826*

*GPO Box 9826*

*HOBART TAS 7001*

##### NOTE:

*Sildenafil citrate is not PBS-subsidised for patients with pulmonary hypertension secondary to interstitial lung disease associated with scleroderma, where the total lung capacity is less than 70% of that predicted.*

*Sildenafil citrate is not PBS-subsidised when used in combination with PBS-subsidised bosentan monohydrate, PBS-subsidised iloprost trometamol, or PBS-subsidised epoprostenol sodium.*

continued ➡

| Code | Item and Section 100 Restriction | Pack<br>Size | Price ex<br>Manufacturer<br>\$ | Proprietary<br>Name and<br>Manufacturer |
|------|----------------------------------|--------------|--------------------------------|-----------------------------------------|
|------|----------------------------------|--------------|--------------------------------|-----------------------------------------|

*The following provides some explanatory notes regarding the availability of PBS-subsidised treatment with:*

*(a) bosentan monohydrate, of primary pulmonary hypertension or pulmonary arterial hypertension secondary to scleroderma, in patients with disease of WHO Functional Class III or IV severity; AND*

*(b) iloprost trometamol, of primary pulmonary hypertension, drug-induced pulmonary arterial hypertension or pulmonary arterial hypertension secondary to connective tissue disease, in adult patients with disease of WHO Functional Class III or IV severity; AND*

*(c) epoprostenol sodium, of primary pulmonary hypertension, in patients with disease of WHO Functional Class III or IV severity; AND*

*(d) sildenafil citrate, of primary pulmonary hypertension or pulmonary arterial hypertension secondary to connective tissue disease, in patients with disease of WHO Functional Class III severity.*

*Adult patients:*

*From 1 March 2007, adult patients with primary pulmonary hypertension will be able to access, through the PBS, bosentan monohydrate, iloprost trometamol, epoprostenol sodium or sildenafil citrate (WHO Class III only). Once these patients are approved initial treatment with 1 of these 4 drugs, they may swap between bosentan monohydrate, iloprost trometamol, epoprostenol sodium and sildenafil citrate at any time without having to re-qualify for treatment with the alternate agent. This means that patients may commence treatment with the alternate agent, subject to that agent's restriction, irrespective of the severity of their disease at the time the application to swap therapy is submitted. It also means that no new baseline measurements will be necessary (unless the prescriber wishes to submit new baselines).*

*Patients may only swap to bosentan monohydrate, iloprost trometamol, epoprostenol sodium or sildenafil citrate if they have not failed prior PBS-subsidised treatment with that drug.*

*Adult patients with pulmonary arterial hypertension secondary to scleroderma will be able to access, through the PBS, bosentan monohydrate, iloprost trometamol or sildenafil citrate (WHO Class III only). Once these patients are approved initial treatment with 1 of these 3 drugs, they may swap between bosentan monohydrate, iloprost trometamol and sildenafil citrate at any time without having to re-qualify for treatment with the alternate agent. This means that patients may commence treatment with the alternate agent, subject to that agent's restriction, irrespective of the severity of their disease at the time the application to swap therapy is submitted. It also means that no new baseline measurements will be necessary (unless the prescriber wishes to submit new baselines).*

*Patients may only swap to bosentan monohydrate, iloprost trometamol or sildenafil citrate if they have not failed prior PBS-subsidised treatment with that drug.*

*Adult patients with pulmonary arterial hypertension secondary to connective tissue disease other than scleroderma will be able to access, through the PBS, iloprost trometamol or sildenafil citrate (WHO Class III only). Once these patients are approved initial treatment with 1 of these 2 drugs, they may swap between iloprost trometamol and sildenafil citrate at any time without having to re-qualify for treatment with the alternate agent. This means that patients may commence treatment with the alternate agent, subject to that agent's restriction, irrespective of the severity of their disease at the time the application to swap therapy is submitted. It also means that no new baseline measurements will be necessary (unless the prescriber wishes to submit new baselines).*

*Patients may only swap to iloprost trometamol or sildenafil citrate if they have not failed prior PBS-subsidised treatment with that drug.*

*Patients with drug-induced pulmonary arterial hypertension are only eligible for treatment with iloprost trometamol. They may not swap to bosentan monohydrate, epoprostenol sodium or sildenafil citrate.*

*Patients under 18 years of age:*

*From 1 March 2007, patients aged less than 18 years with primary pulmonary hypertension are eligible to receive PBS-subsidised treatment with bosentan monohydrate, epoprostenol sodium or sildenafil citrate (WHO Class III only). Once these patients are approved initial treatment with 1 of these 3 drugs, they may swap between bosentan monohydrate, epoprostenol sodium and sildenafil citrate at any time without having to re-qualify for treatment with the alternate agent. This means that patients may commence treatment with the alternate agent, subject to that agent's restriction, irrespective of the severity of their disease at the time the application to swap therapy is submitted. It also means that no new baseline measurements will be necessary (unless the prescriber wishes to submit new baselines). They may qualify for treatment with iloprost trometamol when they are aged 18 years or older.*

*Patients may only swap to bosentan monohydrate, epoprostenol sodium or sildenafil citrate if they have not failed prior PBS-subsidised treatment with that drug.*

|------|----------------------------------|--------------|--------------------------------|-----------------------------------------|

**1. Definition of primary pulmonary hypertension, drug-induced pulmonary arterial hypertension or pulmonary arterial hypertension secondary to connective tissue disease, including scleroderma.**

*Primary pulmonary hypertension, drug-induced pulmonary arterial hypertension or pulmonary arterial hypertension secondary to connective tissue disease, including scleroderma, are defined as follows:*

- (i) mean pulmonary artery pressure (mPAP) greater than 25 mmHg at rest and pulmonary capillary wedge pressure (PCWP) less than 18 mmHg; or
- (ii) mPAP greater than 30 mmHg with exercise and PCWP less than 18 mmHg; or
- (iii) where a right heart catheter cannot be performed on clinical grounds, right ventricular systolic pressure (RVSP), assessed by echocardiography (ECHO), greater than 40 mmHg, with normal left ventricular function.

**2. Definition of WHO Functional Class III or IV disease severity.**

(a) WHO Functional Class III disease severity is defined as follows:

*Patients with pulmonary hypertension resulting in marked limitation of physical activity who are comfortable at rest and on ordinary physical activity experience dyspnoea or fatigue, chest pain or near syncope.*

(b) WHO Functional Class IV disease severity is defined as follows:

*Patients with the inability to carry out any physical activity without symptoms. These patients manifest signs of right heart failure. Dyspnoea and/or fatigue may even be present at rest. Discomfort is increased by any physical activity.*

**3. Designated hospitals.**

*Refer to the Medicare Australia website at [www.medicareaustralia.gov.au](http://www.medicareaustralia.gov.au) for a list of designated hospitals.*

**4. Test requirements to establish baseline for initiation of treatment and response to treatment for continuation of treatment.**

(a) **Initiation of treatment.**

(i) **New patients.**

*The first written application for PBS-subsidised treatment with the first of either bosentan monohydrate, iloprost trometamol, epoprostenol sodium or sildenafil citrate should be accompanied by the results of a right heart catheter (RHC) composite assessment, plus an echocardiograph (ECHO) composite assessment, plus a 6 minute walk test (6MWT) to establish the patient's baseline measurements.*

*Where it is not possible to perform all 3 tests above on clinical grounds, the following list outlines the preferred test combination, in descending order, for the purposes of initiation of PBS-subsidised treatment:*

- (1) RHC plus ECHO composite assessments;
- (2) RHC composite assessment plus 6MWT;
- (3) RHC composite assessment only.

*In circumstances where a RHC cannot be performed on clinical grounds, applications may be submitted to Medicare Australia for consideration based on the results of the following test combinations, which are listed in descending order of preference:*

- (1) ECHO composite assessment plus 6MWT;
- (2) ECHO composite assessment only.

*Where fewer than 3 tests are able to be performed on clinical grounds, a reason outlining why the particular test/s could not be conducted must be provided with the authority application.*

*Where patients were initiated on PBS-subsidised treatment either with bosentan monohydrate on or after 1 March 2004, with iloprost trometamol on or after 1 April 2005, with epoprostenol sodium on or after 1 August 2006 or with sildenafil citrate on or after 1 March 2007, the test results provided with the initial application must be no more than 2 months old at the time of application. These results will form the baseline against which response assessments will be made.*

*Where patients received treatment with either bosentan monohydrate, iloprost trometamol, epoprostenol sodium or sildenafil citrate prior to being commenced on PBS-subsidised treatment with the first of either bosentan monohydrate, iloprost trometamol, epoprostenol sodium or sildenafil citrate, the test requirements above still apply. The results that will form the baseline against which response assessments will be made will be those measured at the time patients commenced non-PBS-subsidised treatment with either bosentan monohydrate, iloprost trometamol, epoprostenol sodium or sildenafil citrate, whichever of the 4 drugs the patient received first.*

| Code | Item and Section 100 Restriction | Pack<br>Size | Price ex<br>Manufacturer<br>\$ | Proprietary<br>Name and<br>Manufacturer |
|------|----------------------------------|--------------|--------------------------------|-----------------------------------------|
|------|----------------------------------|--------------|--------------------------------|-----------------------------------------|

**NOTE:**

*(ii) Patients who received non-PBS-subsidised treatment with sildenafil citrate prior to 1 March 2007.*

*For patients with primary pulmonary hypertension or pulmonary arterial hypertension secondary to connective tissue disease who were commenced on sildenafil citrate treatment prior to 1 March 2007 and who have received less than 6 months of treatment with sildenafil citrate at the time of application, the first application for PBS-subsidised treatment must include, where available, all 3 test results at the time that the patient commenced treatment with sildenafil citrate, epoprostenol sodium, bosentan monohydrate or iloprost trometamol, whichever was initiated first.*

*For patients with primary pulmonary hypertension or pulmonary arterial hypertension secondary to connective tissue disease who were commenced on sildenafil citrate treatment prior to 1 March 2007 and who have received 6 or more months of treatment at the time of application, the first application for PBS-subsidised treatment must include, where available, all 3 test results at the time that the patient commenced treatment with sildenafil citrate, epoprostenol sodium, bosentan monohydrate or iloprost trometamol, whichever was initiated first. The results at the time of application for initial PBS-subsidised treatment must also be provided and must be no older than 3 months.*

*(b) Continuation of treatment.*

*The following list outlines the preferred test combination, in descending order, for the purposes of continuation of PBS-subsidised treatment:*

- (1) RHC plus ECHO composite assessments plus 6MWT;*
- (2) RHC plus ECHO composite assessments;*
- (3) RHC composite assessment plus 6MWT;*
- (4) ECHO composite assessment plus 6MWT;*
- (5) RHC composite assessment only;*
- (6) ECHO composite assessment only.*

*The results of the same tests as conducted at baseline should be provided with each written continuing treatment application (i.e. every 6 months), except for patients who were able to undergo all 3 tests at baseline, and whose subsequent ECHO and 6MWT results demonstrate disease stability or improvement, in which case RHC can be omitted. In all other patients, where the same test(s) conducted at baseline cannot be performed for assessment of response on clinical grounds, a reason why the test(s) could not be conducted must be provided with the application.*

*The test(s) results provided with the application for continuing treatment must be no more than 2 months old at the time of application.*

**5. Definition of response to sildenafil citrate, bosentan monohydrate, iloprost trometamol, epoprostenol sodium or prior vasodilator treatment.**

*For adult patients with 2 or more baseline tests, response to treatment is defined as 2 or more tests demonstrating stability or improvement of disease, as assessed by a physician from a designated hospital.*

*For adult patients with a RHC composite assessment alone at baseline, response to treatment is defined as a RHC result demonstrating stability or improvement of disease, as assessed by a physician from a designated hospital.*

*For adult patients with an ECHO composite assessment alone at baseline, response to treatment is defined as an ECHO result demonstrating stability or improvement of disease, as assessed by a physician from a designated hospital.*

*For patients aged less than 18 years, response to treatment is defined as at least 1 of the baseline tests demonstrating stability or improvement of disease, as assessed by a physician from a designated hospital.*

**6. Authority approval requirements.** *[The following 2 sections are only relevant to the PBS listing of sildenafil citrate. The requirements specific to bosentan monohydrate, iloprost trometamol and epoprostenol sodium are given in parts 6 and 7 of the NOTE included in the bosentan monohydrate, iloprost trometamol and epoprostenol sodium Schedule entry respectively.]*

*(a) Initiation of PBS-subsidised treatment with sildenafil citrate, where the patient has not received prior PBS-subsidised treatment with bosentan monohydrate, iloprost trometamol or epoprostenol sodium.*

*All applications for initial treatment must be made in writing, must include an authority prescription and must be submitted to Medicare Australia for authorisation. The total duration of initial PBS-subsidised treatment that will be approved with this first written application is up to 6 months.*

*Patients who commence PBS-subsidised sildenafil citrate treatment after 1 March 2007 and patients who received 6 or more months of sildenafil citrate treatment prior to 1 March 2007 are eligible to receive up to 6 months of treatment per authority application.*

| Code | Item and Section 100 Restriction | Pack Size | Price ex Manufacturer \$ | Proprietary Name and Manufacturer |
|------|----------------------------------|-----------|--------------------------|-----------------------------------|
|------|----------------------------------|-----------|--------------------------|-----------------------------------|

*Patients who commenced treatment with sildenafil citrate prior to 1 March 2007 and who have received less than 6 months of treatment at the time of application are eligible to receive sufficient supply to allow the patient to complete a total of 6 months of combined PBS-subsidised and non-PBS-subsidised treatment.*

*All patients with primary pulmonary hypertension or pulmonary arterial hypertension secondary to connective tissue disease who commenced treatment with sildenafil citrate prior to 1 March 2007 will be eligible to commence PBS-subsidised treatment with sildenafil citrate. Thereafter, to be eligible for further PBS-subsidised supply, these patients must demonstrate a response to sildenafil citrate treatment, as defined above under definition of response.*

*(b) Continuation of treatment.*

*Written applications for continuing treatment must be submitted to Medicare Australia for authorisation every 6 months. Approvals will be limited to provide sufficient supply for up to a maximum of 6 months of treatment, based on the dosage recommendations in the TGA-approved Product Information.*

*Applications for continuing treatment will only be approved for patients who have currently demonstrated a response to treatment with sildenafil citrate.*

*The assessment of the patient's response to the first and subsequent 6 month courses of treatment should be made following the preceding 5 months of treatment, in order to allow sufficient time for a response to be demonstrated. Applications for continuing treatment with sildenafil citrate should be made prior to the completion of the 6 month treatment course to ensure continuity for those patients who respond to treatment, as assessed by the treating physician.*

*(c) Swapping between bosentan monohydrate, iloprost trometamol, epoprostenol sodium and sildenafil citrate.*

*For eligible patients, applications to swap between these 4 drugs must be made under the relevant initial treatment restriction. Patients should be assessed for response to the treatment they are ceasing at the time the application to swap therapy is being made. Patients who fail to demonstrate a response or for whom no assessment results are submitted with the application to swap therapy may not re-commence PBS-subsidised treatment with the drug they are ceasing.*

*It is important that patients are assessed for response to every course of treatment approved within the timeframes specified in the relevant restriction, in order to maximise the choice of treatment.*

*To avoid confusion, applications for patients who wish to swap to an alternate treatment should be accompanied by the previously approved authority prescription, or remaining repeats, for the treatment the patient is ceasing.*

*(d) Cessation of treatment.*

*Patients who fail to demonstrate a response to PBS-subsidised sildenafil citrate treatment at the times where an assessment is required must cease PBS-subsidised sildenafil citrate therapy.*

**7. Re-treatment with sildenafil citrate.**

*Patients who do not respond to treatment are not eligible to receive further PBS-subsidised treatment with sildenafil citrate under any circumstances.*

**8. Further information.**

*A tabulated representation of the above information and the restriction can be obtained from the Medicare Australia website at [www.medicareaustralia.gov.au](http://www.medicareaustralia.gov.au).*

**Public and private hospital authority required**

*Initial (new patients)*

*Application for initial PBS-subsidised treatment with sildenafil citrate of patients who have not received prior PBS-subsidised treatment with bosentan monohydrate, iloprost trometamol or epoprostenol sodium and who have been assessed by a physician from a designated hospital to have:*

*(a) WHO Functional Class III primary pulmonary hypertension and a mean right atrial pressure of 8 mmHg or less, as measured by RHC, unless a RHC is contraindicated on clinical grounds; OR*

*(b) WHO Functional Class III pulmonary arterial hypertension secondary to connective tissue disease and a mean right atrial pressure of 8 mmHg or less, as measured by RHC, unless a RHC is contraindicated on clinical grounds.*

*Patients must have failed to respond [see Note for definition of response] to 6 or more weeks of appropriate vasodilator treatment unless intolerance or a contraindication to such treatment exists.*

*In circumstances where a RHC cannot be performed on clinical grounds, applications may be submitted to Medicare Australia for consideration based on the test results of the ECHO composite assessment plus 6MWT or the ECHO composite assessment only.*

| Code | Item and Section 100 Restriction | Pack<br>Size | Price ex<br>Manufacturer<br>\$ | Proprietary<br>Name and<br>Manufacturer |
|------|----------------------------------|--------------|--------------------------------|-----------------------------------------|
|------|----------------------------------|--------------|--------------------------------|-----------------------------------------|

*Applications for authorisation must be in writing and must include:*

- (1) *a completed authority prescription form [see Note for authority approval requirements]; and*  
 (2) *a completed Pulmonary Arterial Hypertension PBS Authority Application - Supporting Information form [www.medicareaustralia.gov.au] which includes results from the 3 tests below, where available:*

*(i) RHC composite assessment; and*

*(ii) ECHO composite assessment; and*

*(iii) 6MWT; and*

*(3) a signed patient acknowledgment form indicating that the patient understands and acknowledges that PBS-subsidised treatment with sildenafil citrate for primary pulmonary hypertension or pulmonary arterial hypertension secondary to connective tissue disease, OR with epoprostenol sodium for primary pulmonary hypertension, OR with iloprost trometamol for primary pulmonary hypertension, drug-induced pulmonary arterial hypertension or pulmonary arterial hypertension secondary to connective tissue disease, OR with bosentan monohydrate for primary pulmonary hypertension or pulmonary arterial hypertension secondary to scleroderma, will cease if the treating physician determines that the patient has not achieved a response to treatment [see Note for definition of response].*

*Details of prior vasodilator treatment, including the dose and duration of treatment, must be provided at the time of application. Where the patient is commenced on sildenafil citrate treatment due to an adverse event or a contraindication to vasodilator treatment, details on the nature of the adverse event or contraindication according to the TGA-approved Product Information must also be provided with the application.*

*Where fewer than 3 tests (see requirement 2 above) are able to be performed on clinical grounds, a reason outlining why the particular test/s could not be conducted must be provided with the authority application [see Note for test requirements].*

*The maximum quantity authorised will be limited to provide sufficient supply for 1 month of treatment, based on the dosage recommendations in the TGA-approved Product Information. A maximum of 5 repeats may be requested.*

*Where fewer than 5 repeats are requested at the time of application, authority approvals for sufficient repeats to complete a maximum of 6 months of treatment may be requested by telephone by contacting Medicare Australia on 1800 700 270 (hours of operation 8 a.m. to 5 p.m. EST Monday to Friday).*

#### **Public and private hospital authority required**

*Initial (new patients)*

*Application for initial PBS-subsidised treatment with sildenafil citrate of patients who have not received prior PBS-subsidised treatment with bosentan monohydrate, iloprost trometamol or epoprostenol sodium and who have been assessed by a physician from a designated hospital to have:*

*(a) WHO Functional Class III primary pulmonary hypertension and a mean right atrial pressure greater than 8 mmHg, as measured by RHC, unless a RHC is contraindicated on clinical grounds; OR*

*(b) WHO Functional Class III pulmonary arterial hypertension secondary to connective tissue disease and a mean right atrial pressure greater than 8 mmHg, as measured by RHC, unless a RHC is contraindicated on clinical grounds.*

*In circumstances where a RHC cannot be performed on clinical grounds, applications may be submitted to Medicare Australia for consideration based on the test results of the ECHO composite assessment plus 6MWT or the ECHO composite assessment only.*

#### **Public and private hospital authority required**

*Initial (grandfather patients)*

*Application for initial PBS-subsidised treatment with sildenafil citrate of patients who were receiving treatment with sildenafil citrate prior to 1 March 2007, who have not received prior PBS-subsidised treatment with bosentan monohydrate, iloprost trometamol or epoprostenol sodium and who have been assessed by a physician from a designated hospital to have:*

*(a) WHO Functional Class III primary pulmonary hypertension; OR*

*(b) WHO Functional Class III pulmonary arterial hypertension secondary to connective tissue disease.*

continued ➞

|------|----------------------------------|--------------|--------------------------------|-----------------------------------------|
|------|----------------------------------|--------------|--------------------------------|-----------------------------------------|

*Applications for authorisation must be in writing and must include:*

(1) a completed authority prescription form [see Note for authority approval requirements]; and  
 (2) (a) for patients who have received less than 6 months of sildenafil citrate treatment at the time of application — a completed Pulmonary Arterial Hypertension PBS Authority Application - Supporting Information form [www.medicareaustralia.gov.au] which includes results of the following 3 tests, where available, at the time treatment with sildenafil citrate was commenced:

- (i) RHC composite assessment; and
- (ii) ECHO composite assessment; and
- (iii) 6MWT; or

(b) for patients who have received 6 or more months of sildenafil citrate treatment at the time of application — a completed Pulmonary Arterial Hypertension PBS Authority Application - Supporting Information form [www.medicareaustralia.gov.au] which includes results of the following 3 tests, both at the time treatment with sildenafil citrate was commenced and at the time of application, where available:

- (i) RHC composite assessment; and
- (ii) ECHO composite assessment; and
- (iii) 6MWT; and
- (3) the date of commencement of sildenafil citrate treatment; and

(4) a signed patient acknowledgment form indicating that the patient understands and acknowledges that PBS-subsidised treatment with sildenafil citrate for primary pulmonary hypertension or pulmonary arterial hypertension secondary to connective tissue disease, OR epoprostenol sodium for primary pulmonary hypertension, OR with iloprost trometamol for primary pulmonary hypertension, drug-induced pulmonary arterial hypertension or pulmonary arterial hypertension secondary to connective tissue disease, OR with bosentan monohydrate for primary pulmonary hypertension or pulmonary arterial hypertension secondary to scleroderma, will cease if the treating physician determines that the patient has not achieved a response to treatment [see Note for definition of response].

Where fewer than 3 tests (see requirement 2 above) are able to be performed on clinical grounds, a reason outlining why the particular test/s could not be conducted must be provided with the authority application [see Note for test requirements].

The maximum quantity authorised will be limited to provide sufficient supply for 1 month of treatment, based on the dosage recommendations in the TGA-approved Product Information. The number of repeats authorised will be dependent on the duration of prior sildenafil citrate therapy. Where patients have received less than 6 months of non-PBS-subsidised treatment with sildenafil citrate, sufficient repeats to allow the patient to complete a total of 6 months of combined PBS-subsidised and non-PBS-subsidised therapy may be requested. Where patients have received 6 months or more of non-PBS-subsidised treatment with sildenafil citrate, a maximum of 5 repeats may be requested. Where fewer than the maximum allowable number of repeats are requested at the time of application, authority approvals for the remainder of the allowable repeats may be requested by telephone by contacting Medicare Australia on 1800 700 270 (hours of operation 8 a.m. to 5 p.m. EST Monday to Friday).

#### **Public and private hospital authority required**

*Initial (change or re-commencement for all patients)*

*Application for initial PBS-subsidised treatment with sildenafil citrate of patients with either of the following:*

- (a) WHO Class III primary pulmonary hypertension or pulmonary arterial hypertension secondary to connective tissue disease who wish to re-commence PBS-subsidised sildenafil citrate after a break in therapy and who have demonstrated a response to their most recent course of PBS-subsidised treatment with sildenafil citrate; OR
- (b) WHO Class III primary pulmonary hypertension or pulmonary arterial hypertension secondary to connective tissue disease and whose most recent course of PBS-subsidised treatment was with iloprost trometamol; OR
- (c) WHO Class III primary pulmonary hypertension or pulmonary arterial hypertension secondary to scleroderma and whose most recent course of PBS-subsidised treatment was with bosentan monohydrate; OR
- (d) WHO Class III primary pulmonary hypertension and whose most recent course of PBS-subsidised treatment was with epoprostenol sodium.

**Section 100 authority required**

*Initial treatment for HER2 positive early breast cancer commencing concurrently with adjuvant chemotherapy following surgery.*

*The total duration of PBS-subsidised treatment (initial plus continuing) that will be authorised is 52 weeks.*

*HER2 positivity must be demonstrated by in situ hybridisation (ISH).*

*Trastuzumab must not be used in patients with a left ventricular ejection fraction (LVEF) of less than 45% and/or with symptomatic heart failure. Cardiac function must be tested by a suitable method including, for example, ECHO or MUGA, prior to seeking the initial authority approval and then at 3 monthly intervals during treatment.*

*Authority applications for initial treatment must be made in writing and must include:*

*(a) a completed authority prescription form; and*

*(b) a completed Early Breast Cancer - PBS Supporting Information Form [may be downloaded from the Medicare Australia website ([www.medicareaustralia.gov.au](http://www.medicareaustralia.gov.au))] which includes:*

*(i) a copy of the pathology report from an Approved Pathology Authority confirming the presence of HER2 gene amplification by in situ hybridisation (ISH); and*

*(ii) a copy of the signed patient acknowledgement form [may be downloaded from the Medicare Australia website ([www.medicareaustralia.gov.au](http://www.medicareaustralia.gov.au))].*

*The medical practitioner should request sufficient quantity based on the weight of the patient to provide for a maximum of 3 weeks' treatment (equivalent to the loading dose for the 3 weekly regimen, and the loading dose and 2 weekly doses for the once weekly regimen).*

**Section 100 authority required**

*Continuing treatment for HER2 positive early breast cancer where the patient has previously received treatment with PBS-subsidised trastuzumab.*

*The patient is eligible to receive sufficient trastuzumab to complete 52 weeks of combined PBS-subsidised and non-PBS-subsidised therapy.*

*Trastuzumab must not be used in patients with a left ventricular ejection fraction (LVEF) of less than 45% and/or with symptomatic heart failure. Cardiac function must be tested by a suitable method including, for example, ECHO or MUGA, at 3 monthly intervals during treatment.*

*Authority applications for continuing treatment may be made by telephone on 1800 700 270 (hours of operation 8 a.m. to 5 p.m. EST Monday to Friday).*

*The medical practitioner should request sufficient quantity based on the weight of the patient for 3 weeks' supply (equivalent to 1 dose for the 3 weekly dosing regimen, or 3 doses for the once weekly dosing regimen). Up to a maximum of 3 repeats may be authorised.*

*Breaks in therapy.*

*Where a patient has a break in trastuzumab therapy of more than 1 week but less than 6 weeks from when the last dose was due, authority approval will be granted for a new loading dose. Authority applications for new loading doses may be made by telephone on 1800 700 270 (hours of operation 8 a.m. to 5 p.m. EST Monday to Friday).*

## Standard Formula Preparations

The following list is not intended to indicate in any way which particular formula an approved pharmacist should use in filling a prescription.

The prices shown in the column 'Dispensed Price for Max. Qty' are for the ingredients, the container and the dispensing fee. The prices shown in the column 'Maximum Recordable Value for Safety Net' are for the ingredients, the container and the dispensing fee and, where applicable, the additional fee for agreed price benefits.

# RPBS Explanatory Notes

## Introduction

### The Australian Repatriation System

1. The Australian Repatriation system is based primarily on the principle of compensation to veterans and eligible dependants for injury or death related to war service. In certain cases, treatment is also provided for accepted injuries or conditions that are not service-related or have occurred as a result of other than war service.
2. Through the *Veterans' Entitlements Act 1986* the Department of Veterans' Affairs provides programs of compensation, income support and treatment for eligible veterans and their dependants. One of the defined benefits for eligible veterans is the Repatriation Pharmaceutical Benefits Scheme. This range of medications and dressings is more comprehensive than is available through the Pharmaceutical Benefits Scheme.

### RPBS prescribing provisions

3. Unless otherwise stated, Repatriation Pharmaceutical Benefits Scheme (RPBS) prescriptions must conform with the requirements of Pharmaceutical Benefits Scheme (PBS) prescriptions, as detailed in Section 1 – Explanatory Notes in the *Schedule of Pharmaceutical Benefits* book. The prescriber shall ensure that a prescription contains the following details:
  - the category of benefit, i.e., RPBS, by placing a cross in the relevant box;
  - the patient's full name and address;
  - the prescription date;
  - the DVA file number of the patient as evidence of entitlement;
  - in the case of authority prescriptions, the Authority approval number or the four digit streamlined authority code;
  - the item, form, strength, quantity and directions;
  - the number of repeats, if applicable;
  - indicate when brand substitution is not permitted; and
  - the name, signature, the prescriber number and address of the prescriber.

### Prior Approval Arrangements

4. The prior approval of the Department is required to prescribe the following:
  - 'Authority required' items (excluding 'Authority required (STREAMLINED)' items) listed in either the PBS or RPBS Schedule;
  - increased quantities and/or repeats of items listed in either the PBS or RPBS Schedule;
  - items listed under section 100 of the *National Health Act 1953*; and
  - other items not listed in either Schedule (non-Schedule items).
5. The above items are to be prescribed on the common PBS/RPBS authority prescription form in accordance with the directions stated in the Explanatory Notes in the *Schedule of Pharmaceutical Benefits* (See also information regarding dental prescribing and prescribing by optometrists under the RPBS in these Notes.)

6. All Authority required prescriptions and requests for non-Schedule items must receive prior approval from the Department. This can be achieved by either:
  - using the Department's national free call number 1800 552 580; or
  - by mailing the written authority prescription to the Veterans' Affairs Pharmaceutical Advisory Centre (VAPAC) at the reply paid address shown at the end of these RPBS Explanatory Notes.

Prior approval is not required from DVA to prescribe an Authority required (STREAMLINED) item (except where increased quantities and/or repeats are required). Instead the authority prescription form must include a four digit streamlined authority code.

7. Some requests for prior approval (including some non-Schedule items) need to be referred by VAPAC to the Repatriation Pharmaceutical Reference Committee for consideration. In such cases a VAPAC pharmacist will advise the prescriber to submit a request in writing that provides the following information:
  - A current clinical report on the patient's condition (such as age, co-morbidities, renal, liver failure) and clinical reports including pathology, biochemistry, diagnostic and other investigations if appropriate.
  - Details of past and current therapy for the condition. Include details of PBS, RPBS and non-Schedule items utilised, and the results of those therapies.
  - Details of the proposed treatment regimen. Include intended dose and duration of treatment and objective measures of response.
  - When the proposed use of the item is outside the TGA-approved indications for use in Australia, provide copies of articles from peer reviewed publications supporting the proposed treatment.
  - Signed, informed patient consent where the item is to be used for a non-TGA-approved indication.
  - For items without Australian marketing approval, a copy of the TGA Special Access Scheme approval to prescribe the drug.
8. Requests for prior approval to prescribe a non-Schedule (PBS or RPBS) item that is of the same therapeutic class (ATC level 3) as an item that is listed on the Schedule, will not be approved unless unequivocal clinical evidence is presented to demonstrate that the requested item is essential for effective treatment of the nominated patient.
9. A pharmacist should not supply an item prescribed on an RPBS Authority Prescription Form unless the form has been approved and stamped by VAPAC, or has been endorsed by the prescriber with a telephone Authority approval number provided by VAPAC. Medicare Australia will not accept RPBS Authority prescriptions that have not been approved by the Department of Veterans' Affairs for payment.

## **Palliative Care Drugs**

10. The following medications may be available, or made available in increased quantities or doses under prior approval arrangements for use only in the palliative care of terminal disease:
  - clonazepam
  - cyclizine
  - dexamethasone
  - disodium pamidronate
  - fentanyl
  - glycopyrrolate
  - hyoscine butylbromide
  - hyoscine hydrobromide
  - ketamine
  - midazolam
  - octreotide

For further information telephone VAPAC on 1800 552 580.

## **Dental Prescribing**

11. Under Department of Veterans' Affairs arrangements, financial responsibility for pharmaceutical benefits prescribed by a Local Dental Officer (LDO) is limited to treatment to which holders of the following cards are entitled:
  - a Gold Repatriation Health Card – For All Conditions; or
  - a White Repatriation Health Card – For Specific Conditions; or
  - an Orange Repatriation Pharmaceutical Benefits Card.

Where possible the LDO shall prescribe in accordance with the provisions governing dental prescribing under the Pharmaceutical Benefits Scheme (PBS).
12. Prescriptions for PBS Dental Schedule items for Gold, White and Orange Card holders are to be dispensed at the PBS concessional rate. Claims for payment by the dispensing pharmacist are to be included with other Repatriation prescriptions. The card holder is required to meet the cost of any applicable brand premium.
13. When a non-PBS Dental Schedule item is prescribed for an eligible card holder, the LDO's private prescription form should be used. The dispensing pharmacist may charge the patient the full cost of the prescription. The patient may claim a refund for the full cost of a non-Schedule item from the Department if an itemised receipt (not a cash register receipt) and a copy of the prescription are provided.

## **Prescribing by optometrists**

14. Optometrists approved as 'PBS prescribers' may write RPBS prescriptions as outlined in Section 1 for medicines listed in Section 2 of the PBS Schedule as pharmaceutical benefits for optometrical use.
15. Medicines in the optometrist list include non-Authority and Authority required items. Procedures for obtaining VAPAC approval to prescribe 'Authority required' optometrist items or increased quantities and/or repeats of optometrist items under the RPBS are the same as indicated under prior approval arrangements above.

16. The list of medicines for prescribing by optometrists under the RPBS is the same as applies under the PBS. There are no optometrist listings in the RPBS Schedule for prescribing for veterans only. There is no provision for optometrist prescribers to request approval to prescribe items that are not included in the PBS optometrist list (non-Schedule items).
17. Optometrist PBS/RPBS prescription forms are for use for prescribing non-Authority or Authority required optometrist items under the RPBS with one item per form only.

## **Provisions governing pricing and payment for RPBS benefits**

### **Introduction**

18. Unless otherwise stated, the pricing and payment principles and arrangements for approved pharmacists supplying pharmaceutical benefits under the RPBS will be the same as those arrangements applying under the PBS.
19. Where a pharmaceutical benefit that is not listed on the PBS or RPBS Schedule is dispensed on an RPBS Authority prescription, a pharmacist will price the benefit and enter the serial number, prescription identifying number and price on the sticker or stamp imprint affixed to the prescription.

### **Pricing of Schedule Items**

20. Items supplied under the RPBS from the PBS Schedule, both ready-prepared and extemporaneously-prepared, will be paid on the same basis as benefits supplied under the PBS. Items supplied under the RPBS from the Repatriation Schedule, including wound dressings, will be paid on the basis of the price as given in the Repatriation Pharmaceutical Benefits section (Section 1 – RPBS Schedule, Drugs, Medicines and Dressings) of the *Schedule of Pharmaceutical Benefits*.

### **Pricing of Non-Schedule Ready Prepared Items**

21. Non-Schedule ready-prepared items are to be priced on the basis of the invoiced, GST-exclusive wholesale price to pharmacists plus the appropriate PBS mark-up and the PBS dispensing fee. Where the item price to pharmacists is greater than \$100.00, a copy of the invoice pertaining to the supply of that item is to be submitted together with the appropriate copy of the authority prescription as part of the claim for payment.

### **Pricing of Non-Schedule Extemporaneously Prepared Items**

22. When an ingredient drug is not listed in the PBS Drug Tariff, the recovery price will be based on the invoiced wholesale price to pharmacists, increased by a mark-up of 100%, calculated in accordance with the directions contained in the pricing instructions for pricing of PBS extemporaneously-prepared benefits in this Schedule. The price paid by the pharmacist for the commercial pack from which the ingredient is used shall be endorsed on the prescription form.

### **Miscellaneous Pricing Rules**

23. The price to pharmacists used as the basis of pricing will be the invoiced, GST-exclusive price from the wholesaler.
24. If multiple quantities of a manufacturer's original pack are supplied, the PBS mark-up is applied to the price to pharmacist of each pack and then totalled. The PBS dispensing fee, and the PBS dangerous drug fee if applicable, are then added to the total of the marked-up prices.
25. When the quantity prescribed corresponds with the quantity of a manufacturer's original pack, in no circumstances will the price payable for one pack exceed that payable for multiples or combinations of packs to supply the quantity prescribed.
26. The list of ingredient drugs and prices included in the PBS Drug Tariff are common to both the PBS and RPBS. Certain restrictions apply regarding the prescribing and dispensing of some of these ingredient drugs as pharmaceutical benefits, e.g., use as additive only.

27. For items prescribed generically, including non-Schedule and wound dressings, the pharmacist should indicate on the prescription the quantity and brand supplied. If prescriptions are not endorsed, the Department will pay the lowest priced acceptable product available.

## **General**

### **Packaging Material, Postage or Freight**

28. Payment to a pharmacist for the costs of packaging materials, postage or freight required to supply a pharmaceutical benefit is to be paid by the patient, who may then claim reimbursement from the Department through the provision of a pharmacist's itemised receipt.

### **Payment for Items Supplied at Short Intervals**

29. For all items dispensed at specific short intervals of time, the Department will pay a separate PBS dispensing fee for each occasion that the drug is supplied and which is acknowledged on receipt by the patient or agent.
30. The price payable on the items supplied will be based on the individual dose quantity supplied. Where applicable, a PBS dangerous drug fee and a minimum container charge will be payable for each supply.

### **Receipts for Patient Charges**

31. Where a charge is paid by a patient in any of the circumstances of paragraphs 13 or 24, the pharmacist is required to provide a printed receipt to the patient with the details of the items or services provided, the amount paid, date of supply and the patient's name and address. The patient may apply for reimbursement from the Department.

### **Special Patient Contributions**

32. The Special Patient Contribution for items listed as Special Pharmaceutical Benefits in the PBS Schedule is not payable by veterans entitled to pharmaceutical benefits under the RPBS. Eligible veterans receiving Special Pharmaceutical Benefits under the RPBS are required to pay only the concessional patient contribution and any applicable brand premium. If a Safety Net Entitlement card is held, the veteran should receive a Special Pharmaceutical Benefit free of charge, subject to any brand premium applicable. Medicare Australia will reimburse the dispensing pharmacist the total dispensed price, less the concessional patient contribution and/or brand premium if applicable.

### **Therapeutic Group Premiums — Authority Processing**

33. Items attracting a therapeutic group premium are dual listed. Dispensing pharmacists are therefore required to select the appropriate code for those items that are dual listed as authority and non-authority items, in order to correctly charge the patient and claim from Medicare Australia. Those authority prescriptions that grant exemption from a therapeutic group premium will have the letters 'TPX' at the beginning of the telephone Authority approval number, or, in the case of a written approval, will be stamped with the words "This prescription does not attract a therapeutic group premium".

## **DEPARTMENT OF VETERANS' AFFAIRS**

### **Authority Prescription Applications**

Applications for authority to prescribe under the Repatriation Pharmaceutical Benefits Scheme (RPBS) should be sent to the Veterans' Affairs Pharmaceutical Advisory Centre (VAPAC) using the free postal service:

REPLY PAID No. 372  
VAPAC (Veterans' Affairs Pharmaceutical Advisory Centre)  
GPO Box 9998  
BRISBANE QLD 4001

**For RPBS enquiries and telephone approvals 24 hours a day the Freecall number is:**

**1800 552 580**

**Departmental pharmacists answer applications for prior approval for non-Schedule items and Authority application calls.**

## REPATRIATION PHARMACEUTICAL BENEFITS

*This Schedule is effective from 1 January 2008 and all previous issues are cancelled.*

*New Schedules take effect on the first day of each month.*

### ANTIOBESITY PREPARATIONS, EXCL. DIET PRODUCTS

#### Antibesity preparations, excl. diet products

### • Peripherally acting antiobesity products

#### ORLISTAT

#### Authority Required

*For the treatment of obese patients.*

*Total treatment will not exceed 12 months from initial application.*

*Patients are eligible for 1 continuous treatment in a lifetime.*

*The patient must be receiving, or enrolled to receive, professional dietetic and weight management advice (where this is available).*

*Initial treatment for patients who meet the following criteria to qualify:*

*(a) Body Mass Index (BMI) greater than or equal to 35 with no known co-morbidities; or*

*(b) BMI greater than or equal to 30 with 1 or more of the following co-morbidities:*

*(i) diabetes;*

*(ii) ischaemic heart disease;*

*(iii) psychiatric conditions;*

*(iv) hypertension.*

*The prescriber must provide the following:*

*(a) initial body weight; and*

*(b) BMI.*

*Continuing treatment for patients who have previously been issued with an authority prescription for orlistat. After 3 months and up to 6 months following commencement of orlistat treatment, patient's initial body weight must have been reduced by 2.5 kg or 2.5% (whichever is the lesser).*

*Continuing treatment for patients who have previously been issued with an authority prescription for orlistat. After 6 months and up to 12 months following commencement of orlistat treatment, patient's initial body weight must have been reduced by 5 kg or 5% (whichever is the lesser).*

#### NOTE:

*The patient should be ideally enrolled in an exercise program and be receiving supplemental vitamins.*

*No application for increased maximum quantities and/or repeats will be authorised. A maximum of 2 courses of either intravenous or intramuscular alefacept (Amevive) treatment will be authorised in a 12-month period.*

*The assessment of the patient's response to the initial course of treatment should be made up to 24 weeks following commencement of the treatment course so that there is adequate time for a response to be demonstrated. Measurement of response should be made prior to the completion of the 24-week follow up to ensure continuity for those patients who meet the criteria. Use of alefacept in combination with other systemic therapies must be in line with the Therapeutic Goods Administration (TGA)-approved Product Information.*

### Authority Required

*Initial treatment by a dermatologist for patients who have severe chronic plaque psoriasis, in whom other systemic therapies are ineffective or inappropriate, with the following criteria:*

*(1) CD4+ lymphocyte counts above the lower limit of normal within 2 weeks prior to dosing;*

*AND*

*(2) Baseline Psoriasis Area and Severity Index (PASI) score of 15 or more (the date of PASI assessment must be provided);*

*AND*

*(3) who have signed a patient agreement form indicating that they understand and acknowledge that RPBS-subsidised treatment will cease if the predetermined response criteria do not support continuation of RPBS-subsidised treatment.*

*If the above requirements cannot be met, the application must state the reasons why these criteria cannot be met.*

*Applications for authorisation must be in writing and must include:*

*(1) a completed authority prescription form;*

*(2) a completed Alefacept (Amevive) RPBS Authority Application - Supporting Information Form (contact the VAPAC on 1800 552 580 for a copy of this form); and*

*(3) a signed patient agreement form.*

### Authority Required

*Initial RPBS-subsidised supply for continuing treatment by a dermatologist for patients who have severe chronic plaque psoriasis and were receiving treatment with alefacept prior to July 2004, who:*

*(1) have demonstrated a response as specified in the criteria for continuing RPBS-subsidised treatment with alefacept (the date of assessment of the patient must be provided); and*

*(2) have signed a patient agreement form indicating that they understand and acknowledge that RPBS-subsidised treatment will cease if the predetermined response criteria do not support continuation of RPBS-subsidised treatment.*

*Applications for authorisation must be in writing and must include:*

*(1) a completed authority prescription form;*

*(2) a completed Alefacept (Amevive) RPBS Authority Application - Supporting Information Form (contact the VAPAC on 1800 552 580 for a copy of this form); and*

*(3) a signed patient agreement form.*

|------|---------------------------------------------------------|-------------|----------------|---------|-----------------------------|---------------------------------------------|--------------------------------------|
|      |                                                         |             |                |         | Price for<br>Max. Qty<br>\$ | Recordable<br>Value for<br>Safety Net<br>\$ |                                      |

### **Authority Required**

*Continuing RPBS-subsidised treatment by a dermatologist for patients who have severe chronic plaque psoriasis and who:*

*(1) at the time of application, have demonstrated a reduction in PASI score of 75% or more from baseline at any time up to 24 weeks following commencement of initial treatment. Re-treatment may be initiated as needed, provided that CD4+ T-cell count is above 250 cells per microlitre and a minimum of 12 weeks has passed between courses of treatment; OR*

*(2) at the time of application, have demonstrated a reduction in PASI score of from at least 50% to up to 75% from baseline at any time up to 24 weeks following initiation of treatment. These patients may receive a second course of alefacept, provided that their CD4+ T-cell count is within the normal range and a minimum of 12 weeks has passed between courses of treatment. Patients must demonstrate a reduction of 75% or more from baseline PASI score at any time up to 24 weeks following the second course of treatment to be eligible to continue RPBS-subsidised treatment.*

*Patients who fail to demonstrate an adequate response, as specified in the criteria for continuing treatment with alefacept, will not be eligible to recommence treatment. Patients unable to complete the course of treatment for reasons other than safety will be eligible to recommence treatment with alefacept within 12 months of the date on which treatment was ceased. Where re-treatment with alefacept after a break in RPBS-subsidised treatment with the drug is sought, the reason for and date of cessation of the previous treatment course with alefacept must be included in the application.*

*Applications for authorisation must be in writing and must include:*

*(1) a completed authority prescription form; and*

*(2) a completed Alefacept (Amevive) RPBS Authority Application - Supporting Information Form (contact the VAPAC on 1800 552 580 for a copy of this form).*

### Authority Required

*Initial treatment, in combination with methotrexate, of specific accepted war-caused or service-related disability of refractory rheumatoid arthritis. Initial treatment may be prescribed by rheumatologists or consultant physicians for the reduction of signs and symptoms and prevention of structural joint damage in adult patients with active rheumatoid arthritis who satisfy all of the following criteria:*

- (1) (a) Proven raised erythrocyte sedimentation rate (ESR) and/or C-reactive protein (CRP); and*
- (1) (b) Proven erosive rheumatoid arthritis without end-stage disease;*
- (2) Failure of an adequate trial of methotrexate and 2 other disease modifying anti-rheumatic drugs (such as sulfasalazine, hydroxychloroquine, leflunomide or cyclosporin) — unless these drugs were contraindicated or intolerance had developed;*
- (3) No history of active tuberculosis requiring treatment in the last 3 years;*
- (4) No history of opportunistic infection in the last 2 months;*
- (5) Female patients of child-bearing age are not pregnant, not breast-feeding, and are using an effective form of contraception.*

*Applications for authorisation must be in writing and must include:*

- (1) a completed authority prescription form; and*
- (2) a completed Infliximab (Remicade) RPBS Authority Application - Supporting Information form (contact the VAPAC on 1800 552 580 for a copy of the form).*

### Authority Required

*Continuing treatment, in combination with methotrexate, of specific accepted war-caused or service-related disability of refractory rheumatoid arthritis. Continuing treatment may be prescribed by rheumatologists or consultant physicians, following initial therapy of 3 doses, in patients who satisfy the following criteria:*

- (1) There is improvement in ESR and/or CRP; and*
- (2) An ACR20 (American College of Rheumatology) response is achieved by 14 weeks after the commencement of therapy.*

*Applications for authorisation must be in writing and must include:*

- (1) a completed authority prescription form; and*
- (2) a completed Infliximab (Remicade) RPBS Authority Application - Supporting Information form (contact the VAPAC on 1800 552 580 for a copy of the form).*

### PSYCHOLEPTICS

#### Anxiolytics

##### • Benzodiazepine derivatives

#### BROMAZEPAM

##### Authority Required

*Patients with terminal disease;*

*Patients with refractory phobic or anxiety states.*

##### NOTE:

*For short-term use and palliative care. This drug should not be used as the first line of treatment. Other PBS-listed benzodiazepines should have been adequately tried and found to be ineffective or inappropriate. Authorities for increased quantities and/or repeats may be granted to patients with terminal disease, and other patients who have been shown to be dependent on this item by an unsuccessful attempt at gradual withdrawal.*

REPATRIATION PHARMACEUTICAL BENEFITS SCHEME (RPBS)  
WOUND ASSESSMENT AND DRESSING IDENTIFICATION

It is essential to define the aetiology of the wound before selecting a dressing. Recommendations are based on wound type, colour of wound base, depth of wound, and amount of exudate.

This wound chart adheres to the MOIST WOUND concept of healing and wound dressings are described below as ABSORBING or MOISTURE DONATING.

Most wound healing products are designed to remain in situ for several days, with the exception of those for infected wounds which should be changed daily. The quantities and repeats listed in the Repatriation Schedule are considered to be adequate to manage the treatment of a wound for two weeks to one month, when an assessment of the wound's healing process should be undertaken.

DRESSINGS

PINK EPITHELIALISING WOUND

Aim: To protect and promote epithelialisation. Epithelialising wounds normally are superficial and only produce a light exudate.

|               |                                                 |                                                  |

RED GRANULATING WOUND

Aims: (1) to protect the granulating tissue; (2) to encourage epithelialisation; (3) to absorb excess exudate.

LIGHT EXUDATE:

(A) Absorbing

Superficial

- Foam (Light Exudate);
- Hydroactive (Superficial Wound—Light Exudate);
- Hydrocolloid (Superficial Wound—Light Exudate)

Cavity

- Hydrocolloid (Cavity Wound)

(B) Moisture donating

- Hydrogel—Amorphous;
- Hydrogel—Sheet

- Hydrogel—Amorphous

HIGH EXUDATE:

(A) Absorbing

Superficial

- Alginate (Superficial Wound);
- Foam—Heavy Exudate;
- Hydroactive (Superficial Wound—Moderate Exudate);
- Hydrocolloid (Superficial Wound—Moderate/High Exudate)

Cavity

- Alginate (Cavity Wound);
- Foam—Moderate Exudate (see “cavity conforming” product);
- Hydroactive (Cavity Wound);
- Hydrocolloid (Cavity Wound)

(B) Moisture donating

NOT APPROPRIATE

BLACK NECROTIC WOUND

Aim: To remove eschar by — (1) sharp debridement, e.g., scissor/scalpel and/or (2) rehydration and autolytic debridement. (These wounds usually produce a LIGHT EXUDATE.)

| DRY / LIGHT EXUDATE:  | Superficial                                                                                                                                                        | Cavity                                                                                         |

INFECTED WOUNDS

Aims: (1) to clear the infection with systemic antibiotics; (2) to absorb excess exudate; (3) to remove slough if present.

MALODOROUS WOUNDS

Aims: (1) to clear infection if present; (2) to remove slough if present; (3) to clear colonising odour-producing bacteria in slough — by applying metronidazole gel; (4) to absorb excess exudate.

Products: Activated Charcoal; Alginate with Charcoal; Foam with Charcoal.

MINOR SKIN TRAUMA

Aims: (1) to stop bleeding; (2) to prevent infection; (3) to minimise the surface defect; (4) to promote epithelialisation.

## **THERAPEUTIC GROUP PREMIUM POLICY**

### **PHARMACEUTICAL BENEFIT ITEMS WHICH HAVE A THERAPEUTIC GROUP PREMIUM WITH EFFECT FROM 1 JANUARY 2008**

The Schedule of Pharmaceutical Benefits shows differences in price in some therapeutic groups where alternative drugs may have a therapeutic group premium.

The Therapeutic Group Premium Policy applies within narrowly defined therapeutic sub-groups where the drugs concerned are of similar safety and health outcomes.

The Australian Government, through the PBS, subsidises up to the price of the lowest priced drug in the group. This means that consumers may have to pay for more expensive drugs (those with a therapeutic group premium). This extra amount does not count towards their PBS safety net threshold.

Therapeutic group premiums apply where a prescriber has prescribed a drug within a therapeutic group that attracts a therapeutic group premium and has not sought an exemption from Medicare Australia on clinical grounds.

The exemption provisions are:

- adverse effects occurring with all of the base-priced drugs; or
- drug interactions occurring with all of the base-priced drugs; or
- drug interactions expected to occur with all of the base-priced drugs; or
- transfer to a base-priced drug would cause patient confusion resulting in problems with compliance.

The premiums are not a Government charge but reflect the fact that the supplier(s) of the drug charge a price higher than the Government is willing to subsidise.

Under the Therapeutic Group Premium Policy drug substitution by pharmacists is not permitted.

For ease of prescribing and dispensing, and in the interests of your patients, the following list shows those PBS drugs that attract a therapeutic group premium.

| Premium<br>Priced<br>Brand | Form and Strength | Max.<br>Qty | Therapeutic<br>Group<br>Premium<br>\$ |
|----------------------------|-------------------|-------------|---------------------------------------|
|----------------------------|-------------------|-------------|---------------------------------------|

### ***H<sub>2</sub>-RECEPTOR ANTAGONISTS***

|                     |                                       |    |      |
|---------------------|---------------------------------------|----|------|
| <i>Zantac</i>       | Effervescent tablet 150 mg (base)     | 60 | 4.18 |
| <i>Zantac Syrup</i> | Syrup 150 mg (base) per 10 mL, 300 mL | 2  | 2.10 |

The base-priced drugs in this therapeutic group are cimetidine, famotidine, nizatidine, and ranitidine hydrochloride (except ranitidine hydrochloride effervescent tablet 150 mg (base) and syrup 150 mg (base) per 10 mL, 300 mL).

### ***DIHYDROPYRIDINE-DERIVATIVE CALCIUM CHANNEL BLOCKERS***

|                         |                                   |    |      |
|-------------------------|-----------------------------------|----|------|
| <i>Adalat Oros 20mg</i> | Tablet 20 mg (controlled release) | 30 | 2.88 |
| <i>Zanidip</i>          | Tablet 10 mg                      | 30 | 2.00 |
| <i>Zanidip</i>          | Tablet 20 mg                      | 30 | 4.00 |

The base-priced drugs in this therapeutic group are amlodipine, felodipine and nifedipine (except nifedipine controlled release tablet 20 mg).

### ***PROTON PUMP INHIBITORS***

|              |                                                                   |    |      |
|--------------|-------------------------------------------------------------------|----|------|
| <i>Zoton</i> | Satchet containing granules for oral suspension, 30 mg per sachet | 28 | 3.63 |
|--------------|-------------------------------------------------------------------|----|------|

The base-priced drugs in this therapeutic group are esomeprazole magnesium trihydrate, omeprazole, pantoprazole sodium sesquihydrate, rabeprazole sodium and lansoprazole (except lansoprazole satchet containing granules for oral suspension, 30 mg per sachet).

## **BRAND PREMIUM POLICY**

### **BRANDS OF PHARMACEUTICAL BENEFIT ITEMS WHICH HAVE A BRAND PREMIUM AND THAT MAY BE SUBSTITUTED WITH EFFECT FROM 1 JANUARY 2008**

The Schedule of Pharmaceutical Benefits shows differences in price between some alternative brands of the same drug product.

Manufacturers can develop generic equivalents and apply to have them listed on the PBS. In doing this, manufacturers need to ensure that they comply with the relevant legislation applicable to patents. These brands are clinically equivalent and must undergo the same strict quality controls. Although these brands are designed to act on the body in exactly the same way, they are usually cheaper than the originator brands.

The Australian Government, through the PBS, subsidises up to the price of the lowest priced brand (except in those instances where the lowest priced brand has, as part of its price, a therapeutic group premium). This means that consumers may have to pay extra for more expensive brands (those with a brand premium). This extra amount does not count towards their PBS safety net threshold.

Brand substitution by pharmacists without reference to the prescriber is permitted for PBS prescriptions where:

- the patient agrees to the substitution;
- the brands are identified in the Schedule of Pharmaceutical Benefits as being interchangeable;
- the prescriber has not indicated on the prescription form that substitution is not to occur; and
- substitution is permitted under the relevant State or Territory legislation.

Prescription forms supplied by Medicare Australia contain a box to be ticked where brand substitution is not to take place.

Prescribers not using these prescription forms should endorse the prescription if brand substitution is not permitted. Where a stamp is used for this purpose, the prescriber will be required to initial the stamped statement.

For ease of prescribing and dispensing, and in the interests of your patients, the following list shows those PBS drugs that attract a brand premium and that can be substituted where permitted. They are listed alphabetically, by brand name, with the brand premium and benchmark brand(s) cited in the last column.

| Premium<br>Priced<br>Brand | Form and Strength                                  | Max.<br>Qty | Brand<br>Premium<br>\$ | Benchmark Priced Brands                                                                                                                                     |
|----------------------------|----------------------------------------------------|-------------|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
