

PBS XML Release Notes

Effective date: 1st June 2013

Release 2

PBS XML Schema version: 2.8

Update 1 (2013-05-09)

Known Defects

The following defects are present in version 2 of the PBS XML and are yet to be rectified.

1. Where a PBS Item (prescribing rule) or Brand (TPP) has been delisted from the Schedule there is no corresponding `pbs:deletion` element to provide notification of the delisting.

The following items have been delisted:

5266E, 5267F, 5268G, 5269H, 5730N, 6486J, 8825L, 9268T

The following brands have been delisted:

1208N HX

The missing `pbs:deletion` elements have an affect on the XSL stylesheets that generate the *PBS Item Table* and *LinkExtract* files. End-dated records are not able to be inserted into those files for the items listed above.

Defects Rectified

The following defects were found in version 1 of the PBS XML and have been rectified.

2. The `pbs:code` element (`@xml:id="a50143978"`) for `pbs:organisation` "Amcla Pty Limited" was empty. The value "QL" has been inserted into the content of this element.

This issue affected the manufacturer code for items 2471C, 2533H, 2512F and 2529D.

Issues Resolved

The following issues were resolved in version 1 of the schedule.

3. Start dates for PBS Items have been restored to pre-February 2013 values, with the exception of new and changed items from March 2013 onward. Start dates later than February 2013 that do not start on the 1st of the month have been adjusted to start on the 1st of the month.

Two PBS XML documents have been made available:

`pbs-2013-06-01-v1.xml` does not have start dates altered

`sd-2013-06-01-v1.xml` has start dates restored and adjusted.

4. Maximum Patient Charge (MPC) for ready prepared items has been corrected. Where appropriate, the `pbs:maximum-patient-charge` element is now a child of the `pbs:prices` element.

The following product listings have had their MPC corrected:
