Data Augmentation

9. PBS Item descriptions from the October 2012 Schedule have been added for certain prescribing rules and `pbs:mp` elements. These are provided for MPs where their preferred term contains any of the words '+', '&', 'with' or 'and', but where they are not listed for the ATC codes V06 and V04.

For prescribing rules (`pbs:prescribing-rule`) the descriptor is provided in the child element `int:title`. For `pbs:mp` elements the descriptor is provided in the child

element `int:label`. NB. A `pbs:mp` element may contain more than one `int:label` child element; in this case either descriptor may be applicable.

These descriptors have been added to the `sd-2013-12-01-v3.xml` document. NB. this document is not valid against the PBS XML Schema v2.8, due to the added elements. The document `pbs-2013-12-01-v3.xml` does not contain the additional descriptions and is schema-valid.

`pbs:mp` elements with October 2012 PBS descriptions are:
