

PBS XML Release Notes

Effective date: 1st May 2016

Release 1

PBS XML Schema version: 2.12

Changes from April 2016 Schedule

1. Drug concepts from AMT version 3 are now included in the PBS XML. New AMT v3 concepts use the SNOMED-CT namespace code 1000168. There are:

991 Item description changes

14 AMT MP preferred term changes

620 AMT MPP preferred term changes

3445 AMT TPP preferred term changes

The following concepts have changed their code, but the PBS XML does not include a `pbs:alteration` element for the change:

Type	Previous code	Current code	Preferred Term
mp	86205011000036106	13681000144105	alendronate + colecalciferol (&) calcium carbonate
mp	21940011000036102	11901000144108	esomeprazole (&) clarithromycin (&) amoxicillin
mp	300591000144101	132091000036106	glycomacropeptide and essential amino acids with vitamins and minerals
mp	21934011000036106	12521000144100	goserelin (&) bicalutamide
mp	32650011000036101	306171000144106	iron
mp	21936011000036103	8131000144107	norethisterone acetate + oestradiol (&) oestradiol
mp	21939011000036107	10131000144107	oestradiol (&) oestradiol + dydrogesterone
mp	21932011000036102	11761000144105	peginterferon alfa-2a (&) ribavirin
mp	21933011000036109	11751000144107	peginterferon alfa-2b (&) ribavirin
mp	21935011000036105	12321000144109	risedronate (&) calcium carbonate
mp	37807011000036103	12911000144102	risedronate (&) calcium carbonate + colecalciferol
mp	177281000036101	342571000144109	rosuvastatin (&) ezetimibe

2. Increase values for maximum quantity and number of repeats are now always specified for prescribing rules.

Known Issues

1. Some changes to Maximum Patient Charge amounts may not be the subject of a `pbs:alteration` element.
