Released	2017-09-12

V3 PBS XML Schema version	3.0
V2 PBS XML Schema version	2.12

Known Issues

1. A change to a treatment-phase may not result in a change to the corresponding `rwt:circumstance` element.
2. The removal of an `<mpp-reference>` in an infusible prescribing rule is missing the corresponding `<moved>` element and previous image.

V2 (Down-convert) PBS XML Changes

1. Fixed invalid previous content.
2. Fixed missing circumstance in deleted restriction.
3. Removed header row from drug extract file.

Changes from Revision 1

4. Fixed incorrect links between `ex-manufacturer` elements and their corresponding `previous` element. Current values of `ex-manufacturer` elements are unaffected.
