Changes since Release 3

3. Down-conversion: Fixed missing `rwt:circumstance` element in deleted restriction (under different conditions than the fix described below). This change has fixed missing restrictions in the `RestrictionExtract_20171201.txt` file. There was no change to the v3.0 PBS XML document.

Changes since Release 2

4. Fixed missing `restriction-reference` elements. This was causing missing records in the history of restrictions for certain prescribing rules and resulted in missing records in the `LinkExtract` file for end-dated restrictions.

Changes since Release 1

5. Down-conversion: Fixed missing `rwt:circumstance` element in deleted restriction. This change has fixed missing restrictions in the `RestrictionExtract_20171201.txt` file. There was no change to the v3.0 PBS XML document.

Known Issues

6. A change to a treatment-phase may not result in a change to the corresponding `rwt:circumstance` element.

7. The unit of measure of the `content` element of an MPUU that is associated with an infusible listing is inconsistent with the unit of measure used for the infusible prescribing rule.
8. (Update) A number of restrictions have change data when they are unchanged. This occurs when an entire `benefit-type` element has been removed and a new `benefit-type` element is added to replace it and some, but not all, of the restrictions have been changed. The items and restrictions affected are as follows:

Item Code	Restriction Code(s)
1220F	6874
