Known Issues

1. A change to a treatment-phase may not result in a change to the corresponding `rwt:circumstance` element.
2. The unit of measure of the `content` element of an MPUU that is associated with an infusible listing is inconsistent with the unit of measure used for the infusible prescribing rule.
3. In the December 2017 Schedule, a number of restrictions had change data when they were unchanged. This occurred when an entire `benefit-type` element was removed and a new `benefit-type` element was added to replace it and some, but not all, of the restrictions had been changed. The items and restrictions affected are as follows:
