

# PBS XML V3.0 Release Notes

1 June 2018 Release 3

Released	2018-05-24
Publication effective date	2018-06-01
V3 PBS XML Schema version	3.0
V2 PBS XML Schema version	2.12
Down-convert version	2018-05-22-01

## Changes since Release 2

1. Down-conversion fix: Missing restriction deletions have been fixed. This issue affected the v2.12 PBS XML and the LinkExtract and Restriction text extracts. The v3.0 PBS XML is unaffected by this change and is unchanged from Release 2.

The following restrictions were deleted:

Item Code	Restriction Code
1453L	6048
9022W	6048
9023X	6048

## Changes since Release 1

2. Pricing reductions have been applied to Golimumab 100mg/mL and other related listings.
3. Statutory price reductions have been applied.
4. Cyclonex brand name change: PBS item 1266P.
5. PBS Item 1024X has been made supply-only.
6. PBS Item 11378W has been changed to Complex Authority Required.

## Changes since 1 May 2018 Schedule

7. The code given in a product listing for a supply-only item is the manufacturer code of the product at the point of delisting. The current manufacturer code is given in the `organisation` element linked to the `tpp` element.

## Known Issues

8. A change to a treatment-phase may not result in a change to the corresponding `rwt:circumstance` element.
9. The unit of measure of the `content` element of an MPUU that is associated with an infusible listing is inconsistent with the unit of measure used for the infusible prescribing rule.
