Known Issues in V3 PBS XML

1. A change to the manufacturer code for TPP *Fucidin 250 mg film-coated tablet, 36* is not correctly represented in the XML. The items affected are as follows:

2. A change to a treatment-phase may not result in a change to the corresponding `rwt:circumstance` element.
3. The unit of measure of the `content` element of an MPUU that is associated with an infusible listing is inconsistent with the unit of measure used for the infusible prescribing rule.
